

Wide alley for easy access to bins and blender.

6,390 ton building by Mike Becker General Contractor Inc.

Product conditioner in load out.

Ranco Fertiliservice Inc.

We at Ranco Fertiliservice, Inc. are dedicated to meeting our customers' needs. Ranco offers the most proven and dependable equipment on the market, and we back it up with service and our own experienced installation crews.

Are you looking for a dry fertilizer-blending or -handling solution? If so, contact us today. The Ranco sales and design team will help you with your project from day one. Ranco has a proven track record of working together with the customer, builder and others associated with the project to ensure success. Ranco has four fully staffed and experienced installation crews. When we sell a system, we prefer to install it so we can ensure that the job is not just done, but finished and finished RIGHT.

Customer Spotlight

We have highlighted a recent project with Wallowa County Grain Growers in Island City, Ore. They have been operational since the spring of 2016.

Features:

Facilities capacity: **6,390-ton capacity**

Receiving systems: **100 tph receiving equipment and 150 tph blending and loadout equipment**

Other benefits detailed: **The blending system consists of four DW bins, two DW additive bins, and a DW impregnation system. A product conditioner has been incorporated in the loadout system above the trucks, which provides lump-free fertilizer to their growers.**

“The new plant has eliminated inventory discrepancies, fertilizer waste and created a much cleaner working environment for our employees.”

–Jeff Lathrop, Island City Division Manager

“We installed a new DW blending system in the spring of ‘16 and it has performed very well since startup. The installation and service crews are friendly and knowledgeable. Our loadout times [are] very fast, accurate, and well blended. I am very pleased with Ranco’s product and service.”

–Don Peterson, Plant Manager, Wallowa County Grain –Growers, Island City Division

COMPANY INFORMATION
